

# Instructions on using the RBI wireless networks.

---

At buildings where the RBI wireless network is available, there are two networks visible on wireless enabled equipment. The two networks are:

1. B2Bwrls - This is the corporate network used by RBI laptops.
2. RBIGuestWifi - This network is for Internet access from all other devices, for use by employees and guests

The combination of these two networks is used to provide all common devices with an Internet connection.

Note - The existing rbiguest/rbiuser will be phased out during 2016 and replaced by the RBIGuestWifi wireless service.

## 1. B2Bwrls - Corporate Network for RBI Laptops

The B2Bwrls network provides laptops with direct access to the internal corporate network. This is a secure network requiring strong authentication and is not visible on a wireless network scan, all the RBI laptops are provided with this configuration automatically. The user of a company laptop will see the following:

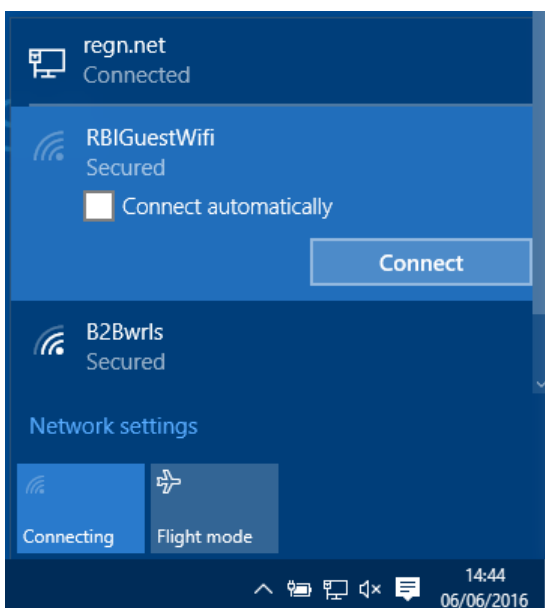

This means that you are connected with the wireless network. If you have wireless reception and a physical network cable to your laptop is connected, for example when the laptop is docked at the desk, then the physical network is automatically used. If your laptop is undocked or the cable is unplugged then there is a chance that the active connection on some applications is lost, as a precaution save any work before undocking.

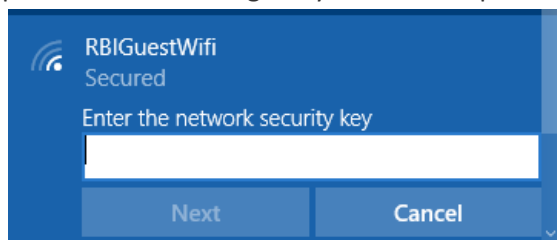

## 2. RBIGuestWifi - Internet access from non company owned equipment

This network gives employees and guests internet access on other devices (anything but corporate laptops). It is therefore possible to access internet wirelessly on your Smartphone / i-pad / private laptop / etc ..

To connect the device let it scan for networks and select "RBIGuestWifi" and click 'Connect'.

Next, enter the code to connect. The code can be found on the [intranet](#). This password will change quarterly, so please check back regularly for the new password in order that you can update your settings.

A blue-themed network selection screen. At the top left is a Wi-Fi icon. The text 'RBI Guest Wifi' is in white, with 'Secured' below it. A white text box contains the prompt 'Enter the network security key'. Below this is a white input field. At the bottom are two buttons: 'Next' and 'Cancel'.

Once connected, you will be asked to read and accept the terms & conditions before continuing. You will also be prompted to again read and accept the terms & conditions if you disconnect from wireless during the day for more than 30 minutes. The below page will pop-up and shouldn't interfere with your use of the connection. The page will display as below:

A black-themed screen titled 'Secure Internet Portal'. Below the title is the heading 'Acceptable Use Policy'. A white box contains the following text: 'Welcome to the RBI Guest Internet Access portal. If you choose to continue, you are agreeing to comply with and be bound by the following terms and conditions of use. If you disagree with any part of these terms and conditions, you may not continue.' Below this is the heading 'Terms of use:' followed by a numbered list: 1. Your use of any information or materials on sites you access is entirely at your own risk, for which we shall not be liable. 2. You agree that you will use the access provided here responsibly and with full regard to the safety, security, and privacy of all other users, devices, and resources. 3. You agree that you will be mindful of the cultural sensitivities of others while using this portal so as not to provoke reaction or offense, and that you will not intentionally access pornography. At the bottom are 'Accept' and 'Cancel' buttons. The footer says 'Powered by Aerohive NETWORKS' with a logo.

Then hit Accept, you should now be connected to the internet from your device.
